| One sentence | I'm studying K-12 students' reading comprehension across print, online, and AI-mediated environments, with a focus on designing interventions and examining the underlying psychological factors that influence their comprehension. |
| Research interests | YooJeong was an elementary school teacher. Building on her experience, she is interested in bridging research and classroom practice by translating research findings into educational practices in K-12 settings. Her research mainly focuses on:<br>● Content area literacy to build robust knowledge<br>● Online evaluation on multimodal and AI generated information<br>● Child-AI interaction during reading and writing |
| Current project | (1) Knowledge revision: Read-Aloud Instruction for SciencE Learning (RAISE Learning)<br>(2) Lateral reading intervention<br>(3) Standards of Coherence: Measurement development studies<br>(4) Supporting AI literacy within content-rich literacy instruction: Content-rich Literacy and AI literacy via Project-based learning (CLAP).<br>(5) Systematic review on digital reading comprehension |
| Life outside work | I enjoy spending time in nature and going camping. |

| ○ Yulu Sun (PhD student) | |
|---|---|
| Photo |  |
| One sentence | My research focuses on bridging psychological research and educational practice to improve children's reading and learning, particularly among children with developmental dyslexia. |
| Research interests | I aim to: (1) investigate the cognitive mechanisms that underlie reading and learning in both typical and atypical childhood development; (2) examine how literacy interactions with educational stakeholders shape children's language and cognitive growth; (3) design and validate evidence-based, AI-enabled agents for school and home-based literacy assessments and interventions. |

| | |
|---|---|
| Current project | (1) Supporting inference-making using educational technology: Inference Galaxy<br>(2) Systematic review on digital reading comprehension |
| Life outside work | I enjoy hiking, reading novels and watching funny TV shows. |

| ○ Jianjian Wu (Master student) | |
|---|---|
| Photo |  |
| One sentence | I study reading comprehension and literacy teacher education because I see reading as a particularly meaningful way to support intellectual growth and personal flourishing, and I believe the vital importance of the role of teachers in children's academic and social-emotional development. |
| Research interests | ● How teachers can support K-12 multilingual students reading motivation across languages<br>● The emotional and motivational aspect of learning and teaching<br>● How interactive reading intervention can improve young struggling readers higher level reading comprehension |
| Current project | (1) Supporting inference-making using educational technology: Inference Galaxy<br>(2) Standards of Coherence: Measurement development studies<br>(3) Systematic review of reading motivation among multilingual children and adolescents |

| | |
|---|---|
| Skill | English (Fluent)/ Chinese (Native)<br>Python, R, Mplus |
| Life outside work | I enjoy swimming, hiking, traveling, watching movies and TV shows. I have a cat named Mimi. |

| ○ Kiera Rosenberg (Master student) | |
|---|---|
| Photo |  |
| One sentence | I study the intersection of math and language because I believe that cognition in these fields are more related than we think |
| Research interests | ● Numerical and linguistic meaning-making<br>● Cross-cultural differences in numerical and linguistic cognition<br>● The role that reading comprehension plays in mathematics |
| Current project | ● Automated analysis of non-linear revision behaviors during timed essay writing<br>● Systematic review on digital reading comprehension<br>● Understanding chronic absenteeism in collaboration with school district leaders |
| Life outside work | I have two cats who are very spoiled. My hobbies outside of work include playing video games, cooking, crocheting and reading novels. |
